

IQ Express

Docking Station

Assured Safety and Compliance in under 20 seconds.

The IQ Express is the perfect complement to our new personal gas detectors, the ToxiPro and ToxiLtd. The IQ Express is a fully automated bump test station that performs up to eight critical tests including:

- Sensor Identification
- Battery Test
- Audible Alarm Test
- Visual Alarm Test
- Vibrating Alarm Test (if applicable)
- Fresh Air Calibration
- Bump Test
- Record Keeping

Automatic Instrument Identification

Automatic Battery Test

Automatic Alarm Tests

Automatic Bump Test

Automatic Calibration

Automatic Record Keeping

Automatic Ready / Fault indication

Cascade between 1 and 4 docks

Standalone calibration station

Connected to PC via USB

Bump test in under 20 seconds

Calibration in under 1 minute

If the instrument fails the bump test, the IQ Express will automatically initiate a full span calibration without further intervention from the user. Total processing time with a full span calibration is still under one minute.

Improve record keeping efficiency. Just place the in the dock and the IQ Express Station does the rest. The IQ Express is cost effective and requires no testing or special clerical skills to use. Workers can check their instruments quickly and easily, minimizing the impact on their work schedule.

The IQ Express connects to your PC via USB to download instrument data. To make testing even easier, you can connect up to 4 IQ Express Stations to a single PC and even run them off the same cylinder of calibration gas (as long as the units have the same type of sensor).

IQ Express

Docking Station

Automated Tests

Key Features

- Automatic Instrument Identification
- Automatic Battery Test
- Automatic Alarm Tests (audible, visible, vibrating)
- Automatic Bump Test
- Automatic Calibration (if necessary)
- Automatic Record Keeping
- Automatic Ready / Fault indication
- Cascade between 1 and 4 docks
- Standalone calibration station
- Connected to PC via USB
- Connect to a PC for enhanced control over calibration and data acquisition during testing
- Bump test in under 20 seconds
- Calibration in under 1 minute

Single or Multiple Docks

Configuration Options

PC Control

Efficient and Economical

Available Models

| Part Number | Type |
|-------------|------------------------------|
| 81-8015-01 | Non Reactive Docking Station |
| 81-8015-02 | Reactive Gas Docking Station |
| 81-8015-03 | Mounting Bracket Kit |
