

# MultiPro IQ Express

## Docking Station

MultiPro IQ Express is the perfect complement to our new confined space multi-gas detector, the MultiPro. This fully automated bump test and calibration station performs up to eight critical tests, including gas sensor identification, instrument performance, and record-keeping procedures in seconds.

The MultiPro IQ Express dramatically improves compliance record-keeping efficiency and accuracy. You just put the gas detector in the dock and the MultiPro IQ Express Station does the rest. Extremely cost-effective, MultiPro IQ Express requires no testing or clerical skills and minimal effort by users.

Workers can check their instruments and get to their jobs with minimal interruptions. The MultiPro IQ Express Station automatically performs eight procedures, including: instrument identification, battery test, audible alarm test, visual alarm test, vibrating alarm test (if applicable), fresh air calibration, bump test, and record-keeping. If the bump test fails, IQ Express will automatically perform a full calibration without intervention from the user.

Total processing time, including testing and calibration just takes a little over a minute. Connect MultiPro IQ Express to your PC via USB or Ethernet\* to download data directly to a PC.

Automatic Instrument Identification

Automatic Battery Test

Automatic Alarm Tests

Automatic Bump Test

Automatic Calibration

Automatic Record Keeping

Automatic Ready / Fault indication

Cascade between 1 and 4 docks

Standalone calibration station

Connected to PC via USB

Bump test in under 20 seconds

Calibration in under 1 minute

# MultiPro IQ Express

## Docking Station

### Automated Tests

### Key Features

- Automatic Instrument Identification
  - Automatic Battery Test
  - Automatic Alarm Tests (audible, visible, vibrating)
  - Automatic Bump Test
  - Automatic Calibration (if necessary)
  - Automatic Record Keeping
  - Automatic Ready / Fault indication
- ### Single or Multiple Docks
- Cascade between 1 and 4 docks
- ### Configuration Options
- Standalone calibration station
  - Connected to PC via USB
- ### PC Control
- Connect to a PC for enhanced control over calibration and data acquisition during testing
- ### Efficient and Economical
- Bump test in under 20 seconds
  - Calibration in under 1 minute

### Available Models

Part Number	Type
72-8015-01	Non Reactive Docking Station
72-8015-02	Reactive Gas Docking Station
72-8015-03	Mounting Bracket Kit
