

SERIES 200 & 300 GAS DETECTION SYSTEMS

RELIABLE HIGH SPEED DETECTION

# MAIN FEATURES

### **HIGH SENSITIVITY**

- Alarm up to 0.5 LEL.m
- 5 Times more sensitive than the normal Open Path equipment

### **FAST RESPONSE**

- Fast response time of 2 seconds (300 series) and ultra fast response of 1 second (200 series).
- 5 to 10 times faster than commonly used Open Path, 20-50 times faster than Point Detector.

### **LOW MAINTENANCE**

High reliability, simple installation, alignment and maintenance, equipment not subject to poisoning.

#### PROVEN TECHNOLOGY

Used in air ducts on FPSO's and offshore rigs for British Petroleum (BP), Shell and ABB Lummus for turbines air intakes etc.

#### HARSH ENVIRONMENT

Specially designed to perform under extreme conditions such as high-speed airflows, high temperatures (up to 158°F (70°C)), humidity and corrosive gases, where point detectors may not be effective.

#### STANDARD INTERFACE OPTIONS

Standard 4-20 mA outputs or RS-485 output to allow networking (up to 64 detectors) to a central monitoring/PC system.

This feature also enables easy maintenance, local and remote diagnostic tools.

The Duct SafEye Open Path was specially designed and is widely used to monitor and alarm against ingress of hazardous gas concentrations into air intakes of turbine engines and HVAC air ducts. Formation and migration of gas clouds and their possible penetration into safe places, control rooms, turbine engines, etc. is a substantial risk that needs to be addressed.

Users, designers, safety and operational engineers are increasingly required to provide for adequate and fast detection and alarm to protect these hazards.

The specific system's design for duct applications requires that the small path across an air inlet responds with a very high sensitivity, full scale of 1 LEL.m for 2-6.6 ft. (0.6-2 m) wide inlet and full scale of 2.5 LEL.m for 6.6-23 ft. (2-7 m) wide inlet.

The Duct SafEye, due to its special optics design, provides for a misalignment tolerance of  $\pm 2^{\circ}$  in all directions and is protected against false gas reading and alarms which are caused by partial obscuration and blocking, misalignment, vibration, flexing or tilts.

Each SafEye unit is factory calibrated in a temperature cycle run at the entire operating temperature range. The temperature compensating mechanism allows correct operation in changing and extreme temperatures while maintaining the system's accuracy. Its internal microprocessor will automatically compensate for low signals with its internal Automatic Gain Control (AGC).

The Duct Safeye system can be factory calibrated to gas mixtures that are associated with offshore production and processing and onshore installations.

GENERAL SPECIFICAT	IONS
Detected Gases	Simultaneous detection of C <sub>1</sub> -C <sub>8</sub> flammable gases.
Detection Range and Response Time	Model         202FD         301FD         302FD           Distance (ft)         6.6-23         2-11.5         9.9-49.5           Distance (m)         2-7         0.6-3.5         3-15           Response Time         1 sec.         2 sec.         2 sec.
Immunity to False Alarm	Is not influenced by solar radiation, hydrocarbon flames, other external laradiation sources, high airflows and high loaded streams.
Spectral Response	$3.0$ - $4.0  \mu m$
Sensitivity Range	0-2.5 LEL.m Standard 0-1 LEL.m by dip-switch setting
Displacement/Misalignment Tolerance	±2°
Drift	Long-term ±5% of full scale
Temperature Range	-40°F (-40°C) to 131°F (55°C) for Series 200 -40°F (-40°C) to 158°F (70°C) for Series 300
ELECTRICAL SPECIFIC	ATIONS
Power Supply	Standard - 24 VDC (18-32 VDC)
Power Consumption	Detector: 150mA @ 24 VDC (200 mA Peak) Source: 100mA @ 24 VDC (220 mA Peak)
<b>Electrical Connection</b>	$2 \times 3/4$ " - 14NPT conduits or $2 \times M25 \times 1.5$ mm ISO
Electrical Input Protection	Complete electrical interface protection against reversed polarity voltage surges and spikes according to MIL-STD-1275A
<b>Electromagnetic Compatibility</b>	EMI/RFI protected CE Marked
OUTPUTS	
4-20mA	The 4-20mA current output is source configuration Resistance Loop 100-600 $\Omega$
4-20mA RS-485	
	Resistance Loop 100-600 $\Omega$ Serial communication for full control with maintenance and trouble shooting
RS-485	Resistance Loop 100-600 Ω  Serial communication for full control with maintenance and trouble shooting facility can be integrated for a network of max 64 detectors  Type Normal Position Maximum Ratings  Alarm SPDT NO, NC 2A at 30VDC or 0.5 at 250 VAC  Accessory SPST Open 5A at 30VDC or 250VAC  Fault SPST Closed 5A at 30VDC or 250 VAC

## ACCESSORIES

The following optional accessories designed for the SafEye system are available.

### **Duct Mounting**

The duct mount interfaces between the detector and the duct surface.

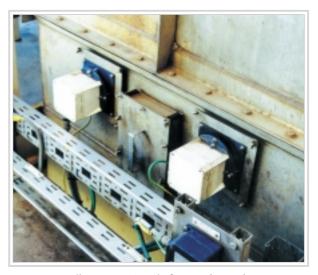

The duct mount enables the detector's alignment up to  $3^{\circ}$  in all directions (P/N 794716).

### **Function Check Filter**

Used for on-site functional testing of the detector (P/N 794220).

**Alignment Telescope** is used for simple on-site alignment of the detector with the light source (P/N 794245).

**Magnetic Switch** The magnetic mode selector is used in the field to change the detector's mode for alignment and calibration procedures (P/N 790285).

Air Duct Installation on ETAP Platform in the North Sea

# TYPICAL APPLICATIONS

Offshore Oil & Gas Exploration Oilrigs and FPSOs; Onshore Oil & Gas Terminals; Storage Farms and Filling Stations; Petrochemical and Chemical Industries; Power Utilities and Turbines areas; Automotive, Painting, Printing, Pharmaceutical Industries and many more...

Specific applications include: • HVAC ducts (Heating Ventilation Air Conditioning) in accommodations areas • Air ducts in process areas • Stacks and exhaust towers • Compressors and generators enclosures • Curing ovens and drying equipment, printing equipment • Engine & Turbine air intake and exhaust • Air intake to safety enclosures • Paint-booths and paint production and drying processes • Air ventilation shafts
