

# SDM-E2

## Docking and calibration station for the Eagle 2

The SDM-E2 is a versatile calibration station enabling easy operation and maintenance for your Eagle 2 portable gas monitor.

Featuring advanced charging, calibration and bump testing, the SDM-E2 also automatically logs and stores all data to ensure keeping track of your records and maintaining your detector are kept simple.

Available as a stand-alone unit, or expandable up to 10 units and hooked via USB cables to a computer, the SDM-E2 is equipped with two gas ports and can take up to two calibration gas mixtures to each module.

The modular system is Windows compatible and when the unit is attached to a PC, automatic calibration and bump test options are available.

Clearly marked ports and controls make this a simple system to set and update. The Eagle monitors are robust and known for their durability. This calibration station is the perfect complement to your gas monitoring fleet.

## KEY FEATURES

### • Stand Alone Station

- No connection to PC required
- Charging (NiMH batteries)
- Performs calibration and bump tests
- Save calibration and bump test records
- USB port
- 2 Calibration gas ports
- Includes PC software for maintenance of records

### Multi Module System

- Up to 10 multiple modules connected to a PC
- Charges units whilst performing calibration and bump testing
- Configure Eagle 2 parameters
- 2 Calibration gas ports
- Archive records and data to network location
- Software controlled data retrieval
- Windows compatible
- Automatic calibration/bump test option
