

# AIRSCAN IRF9

Infrared Refrigerant and CO2 detector

The industrial refrigeration industry is changing rapidly. The manufacture of R-22 and other HCFCs are being phased out, and manufacturers of cooling systems are introducing new equipment that runs on 407a, 422d, 410a, NH<sub>3</sub> and CO<sub>2</sub>. In step with these changes, EPA fines have escalated for anyone venting ozone- depleting gases. What's your best move? With Gastech, you can green the envi- ronment—and green your bottom line.

Gastech Infrared monitoring solutions are designed to help your plant operate more efficiently and cost effectively. Unlike sample draw systems which take longer to pinpoint a gas leak, our diffusion sensing technology cuts downtime and the cost of expensive refrigerant replacement. Other technological advan- tages include flexible standalone or networkable configurations, long operating life expectancy (10+ years); fewer calibration requirements; self-monitoring SensorCheck technology; guaranteed EPA compliance; and accurate, reliable response to all refrigerant gases used in industrial or commercial processes.

#### **REFRIGERANT SPECIFIC**

- Rapid response to refrigerants including R-404a, R-22, R-507, R-134a, R- 407a, R-410a, R-422d, NH3 and CO<sub>2</sub>
- Internal monitoring of 4/20 mA loop circuitry continuously

#### **DIFFUSION-DESIGN SENSOR**

• Has no moving parts and doesn't require pumps or filters

 All points of detection can be monitored continuously at an affordable cost

#### VERSATILITY

- Can be used with any Honeywell
  Analytics readout
- Standard range of 0-3,000 ppm, can be rescaled for lower trip points
- Provides a linear output of 4/20 mA as a function of refrigerant concentration
- Simple, real-time calibration eliminates maintenance downtime
- Automatically adapts to fluctuating temperatures

#### LONG-LASTING PERFORMANCE

 Unique internal reference channel compensates for dust particles, source degradation, humidity and temperature fluctuation, food odours, chemical cleaners, etc.

## **KEY FEATURES**

- Rapid response to refrigerants including R-404a, R-22, R-507 or R-134a
- No moving parts and pumps/ filters not required
- Can be used with any Honeywell Analytics readout
- Long-Lasting Performance
- ATMOS<sup>™</sup> Technology
- SensorCheck<sup>™</sup> Technology
- Superior EMI/RFI shielding

## AIRSCAN IRF9

#### **ATMOS<sup>™</sup> TECHNOLOGY**

Allows for operation down to -60°F and in condensing humidity environ ments or during washdown

· Automatically adapts to its environment and provides accurate and reliable performance under the harshest conditions

#### SENSORCHECK<sup>™</sup> TECHNOLOGY

- · Checks operating parameters of sensors and sends a notification output signal if an anomaly is identified
- · Tests the sensor every 24 hours for

electrical viability

 Indication can be detected by a Manning gas monitor or PLC

#### HOUSING

- High-mass metal bench provides structural and thermal stability and greater immunity to vibration
- Superior EMI/RFI shielding

SPECIFICATIONS	Specifications subject to change without notice
Gases Monitored	R-404a, R-22, R-507, R-134a, R-407a, R-410a, R-422d, CO2
Gas Sampling	Diffusion method with no moving parts, real time continuous monitoring of all points Output Linear 4/20 mA output into a load resistor of 500 ohm maximum
Accuracy	+/- 3% full scale Repeatability +/- 1% full scale
Humidity	0-100% RH (condensing)
Operating Temperature	-40°C to +60°C / -60°F to +140°F
Storage Temperature	-28°C to +60°C / -20°F to +140°F
Cable Recommendation	Three conductor, stranded shielded cable with drain wire, all enclosed in a vinyl jacket. For cable runs up to 200 feet, use 18# AWG (Belden #8770 or equivalent).
Power Source	24 Volts DC regulated, 1.2 amp max.

Repeatability	+/- 1% full scale
Response Time	T90 = 10 seconds with full-scale calibra- tion gas @ .75 litres/min. flow rate Ranges R Gases: 0-500 ppm, 0-1,000 ppm, 0-3,000 ppm CO2: 0-1%, 0-3%
Sensor Viability Test	SensorCheck, an internal microprocessor determines the sensor's electrical viability every 24 hours. If the viability test fails a 0.5 mA signal will indicate a fault. An internal light will show if a sensor is dried up or dis- connected.
Enclosure	NEMA 4, gasketed, molded fiberglass rein- forced polyester. Non-painted, non-rusting construction for food areas. UL 508 listed CSA certified for use with industrial control equipment.
Weight	4.4 lbs.
Part Number	79-1000
