

GM2S /GM3S

Combustible Gas Monitor

Corrosion-proofed electronics

Waterproof sensors

Ultra low power consumption

Low battery alarm

Low cost

One year Warranty

When it comes to the safety and the protection of your assets. A Gas detection systems is a critical device on all transport vehicles where LPG gas and Petrol is being stored or used.

You need a combustible gas detector that you can depend on to watch over you without the risk of failure.

The GM2S Combustible Gas Monitor is designed to be fail-safe, and to be able to withstand the rigorous of a marine installation.

Some of the unique features of the GM2S are;

Waterproof sensors, will continue to function properly even after total immersion in sea water. This is essential in a marine gas detector, but is in fact unique to the GM2S.

Ultra low power consumption, Gas detectors normaly have a large current draw on batteries. The GM2S uses energy efficient circuitry which has only minimal battery draw.

Corrosion-proofed electronics, All circuitry is coated with a specially formulated protective lacquer.

Low battery alarm, The GM2S has an audible and visible alarm which warns of a dropping battery voltage.

Make Sentinel Systems

Model GM2S

Voltage range 7V - 30V

Maximum current draw 290 mA

Current draw (24V) 180 mA

Sensor lead length 6 meters

Colors white

Standard supply

One GM2S controller

One Solenoid (Specify Voltage 24/12VDC)

Two Sensors 6m leads (GM3S comes with 3 Sensors)
